# Wood

## Recycling & Management

### Wood

Every year, 10 million tonnes of wood is disposed of in the UK, yet only 1.5 million tonnes is recycled.

Ward recycles all wood waste including used delivery pallets, manufacturing waste, processed wood, such as chipboard, compressed and bonded wood composites, plywood and MDF. We can process preservative-treated off-cuts and all untreated wood from a variety of industries.

We also work with green wood waste from tree surgery, landscaping and gardening.

### Why choose wood recycling?

- Our team manages every aspect of the process, freeing up your time and resources.
- Reduce your business costs by diverting all your wood waste into the recycling chain instead of costly landfill.
- Boost your environmental performance through recycling.
- Reduce your carbon footprint and minimise your environmental impact.
- Improve overall resource efficiency.

**Not sure if your wood waste is suitable for bulk recycling?**

**Get in touch with the team now and let us help.**

### Bulk wood recycling - simple storage solutions for business.

We offer wood collections as an ad-hoc or scheduled service, using containers ranging from 8 yard skips to 40 yard roll on/roll off containers.

We also offer a wait and load service for one off collections - from small single pick ups up to large volume 130 cubic yard articulated collections.

**1Mt**

Each year in the UK, building and demolition generates approximately 1 mt (2010) of mixed wood waste.

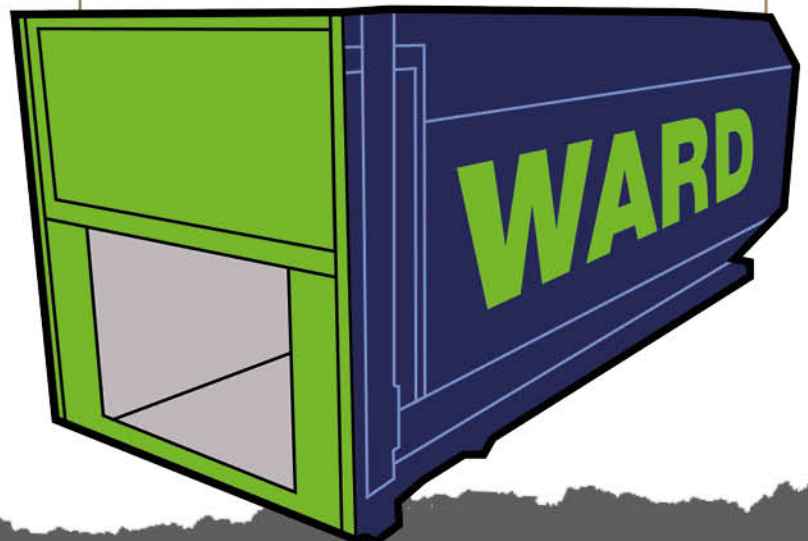

**60%**

It is estimated that in 2011 around 2.8mt (or 60%) of all wood waste generated in the UK was recycled.

**38%**

Around 38% (c.1.1mt, 2010) of all recycled wood is used in the UK manufacture of particleboard.
