

WARD

Building & Construction Waste

Recycling & Management

In the UK, the building, construction and demolition sector is the largest single contributor of waste materials annually¹.

Ward provides nationwide services for building, construction and demolition waste collection, removal and recycling. Construction firms, property developers, builders and demolition contractors rely on Ward for accredited, reliable and efficient waste management services, delivered at the right price.

We can support you with all types of waste collection and recycling, land remediation and site clearances - including processing, crushing, screening and recycling concrete, rubble and metals. We can also supply and collect skips and containers, underpinning your on-site waste management plans.

Ward is committed to being at the forefront of waste management in the UK's building and construction sector.

WARD

Recycling & Management

Our aim is to recycle every last piece of material and dispose of waste as efficiently as possible, to reduce environmental impact and landfill tax. Our UK-wide services include land remediation and site clearance (including contaminated soil and land), removal and processing of hazardous waste (including Asbestos).

Through our state of the art processing plants in the Midlands and our partner network, we are able to process concrete, rubble and hardcore on and off-site to create Type 1 substrates. We also process and recycle metals, polythene and plastics, wood, off cuts and plasterboard.

Why choose Ward for Construction waste?

- We offer nationwide materials handling and waste management services, tailor made for your business
- Fully accredited service - Ward holds ISO9001 quality and ISO14001 environmental management accreditation

- We support your environmental requirements by providing detailed monthly waste reports and access to SmartWaste
- All our services can be ad-hoc or setup as a fully managed scheduled service
- Guaranteed safe disposal of your hazardous waste by experienced and licensed professionals
