

WARD

Keeping it Confidential Recycling & Management

Ward provides UK-wide services for confidential waste disposal, recycling and secure destruction of private materials and data.

Confidential waste includes any personal, business, commercial, private or sensitive information. This covers employee files, payroll, VAT and accounting records, customer information, sales records, payment details, banking information and health or equality data. Once this information is no longer required, it is essential that it is securely disposed of to protect individuals and businesses from identity theft or fraud and to comply with data protection legislation.

Our services include 100% secure confidential waste disposal, paper shredding, high security shredding, waste recycling, disposal of redundant IT equipment, secure mobile shredding, general and specialist waste disposal. We also offer deep burial at landfill or high temperature incineration for hazardous, chemical or ultra-confidential waste material.

Ward is committed to being at the forefront of confidential and secure waste management in the UK.

Confidential Waste & Secure Destruction

Recycling & Management

WARD

Secure shredding and data disposal

One of the biggest security threats in modern business is unauthorised use of private data. Ward provides on and offsite confidential shredding solutions to securely destroy, pulp and recycle your documents and publications. We can also provide secure destruction of anything from armour (for the Ministry of Defence) to redundant IT equipment and hard drives.

We offer recycling, disposal and destruction of confidential materials on an ad-hoc basis or we can set you up with a fully managed, scheduled service.

Why choose Ward for Confidential Waste & Secure Destruction?

- We offer bespoke shredding services, tailor made for your business
- Only approved staff process data destruction to control your confidential waste handling
- Our incineration services and highly specialised staff comply with the highest levels of waste management accreditation
- All customers benefit from a free data security audit
- Secure, lockable containers are provided for your sites
- We support you with developing workplace Privacy Policies
- All our services can be ad-hoc or setup as a fully managed scheduled service
