## Sorted for **Dry mix**

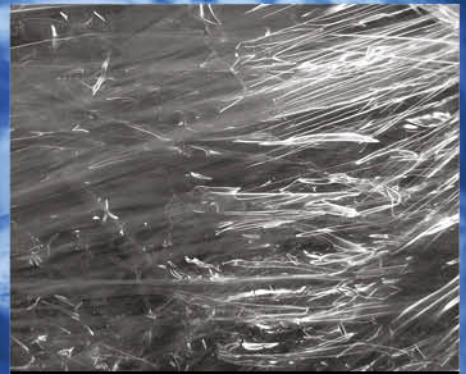

### Recycling & Management

**Dry Mix recycling from Ward is a service for business customers aimed at simplifying recycling in the work place. We offer a simple collection service for any dry, mixed recyclable materials which ensures full compliance with all environmental legislation and helps to exceed waste recycling targets.**

By separating out all dry recyclable materials from your general waste and storing in one container, customers can make significant cost savings and free up storage space, by removing the need for multiple containers.

The nature of Ward's dry mix recycling service also means that your staff spend less time managing waste and more time focussing on their jobs.

**Ward is committed to being at the forefront of dry mix recycling for business in the UK.**

Polythene

Steel & aluminium cans

Plastic films & bottles

Cardboard & paper

# Dry mix

## Recycling & Management

### Mixed recycling

Mixed recyclables are taken to our state of the art processing facility for sorting. Ward aims to recycle 100% of your waste, so your materials avoid landfill tax and deliver significant waste management cost savings.

Mixed recyclables can be collected in wheelie bins or open skips which range in size from 5 to 40 cubic yards. For larger collections we offer fully enclosed containers from 8 to 40 cubic yards. If you are looking for smaller, more regular collections, we recommend our bag collection service, also ideal if space is limited.

### Why choose dry mixed recycling?

- Our team manages every aspect of the process, freeing up your time and resources.
- Reduce your business costs by diverting all your Dry Mix waste into the recycling chain instead of costly landfill.
- Boost your environmental performance through recycling.
- Reduce your carbon footprint and minimise your environmental impact
- Improve overall resource efficiency.

**78%**

In the UK over 78% of cardboard and paper is recovered and recycled which is very encouraging. This is considerably higher than the average in the EU.

**80m**

Global amount of polythene produced each year

**1/400**

Currently only 1 in every 400 disposable coffee cups in the UK is recycled.
